

Appl. No. 10/628,928
Reply to Office Action of September 9, 2004

DRAWING OBJECTION

There is objection to the drawing for failing to make reference to element 9. The drawing shows pumps 19a and 19b. It is submitted that the error was a clerical error in the specification and not in the drawing. Therefore, the specification is corrected hereinabove to substituted "19a" for "19" at page 80, line 3. That this is an obvious correction to an obvious error can be seen by the discussion in the last sentence of page 79 referring to pumps 19a and 19b; and that the discussion in the continued paragraph at the top of page 80 first refers erroneously to pump 19 followed by a discussion of pump 19b. Withdrawal of the objection to the drawings is respectfully requested.
